

PURPOSE OF COMMUNITY

The Enterprise Excellence Community brings our best locally and globally together to gain insights, learn and help each other create a better future.

HOW DOES THE COMMUNITY WORK?

Virtual Gemba with our Worlds Best!

A monthly virtual community meeting brings our global best practice site and experts to our screens for a virtual gemba. We ask our guests about their journey, why they did it, their challenges, and how they overcame them. We go for a virtual Gemba walk to see their journey and achievements. The hour-long event concludes with question time, where we can get further under the hood of what we saw to understand it more deeply and take away learnings to help our organisations.

Local Physical Gemba to Learn and Help Each Other!

The community meets nationwide at one of our sites to see what they have achieved, share our challenges and successes and have a few drinks. In some cases, not all members can attend local site visits, depending on competitive situations between members.

Annual Conference!

This proposed event brings us all together for a few days to network and learn from each other and our global experts and best-performing organisations. This event will allow us to network, challenge each other and learn together with our worlds experts.

Community library in the Enterprise Excellence Group on our website!

The library includes resources and videos, accessible anytime to help your organisation. The group also provides a safe platform to share content and to connect with each other.

BENEFITS OF COMMUNITY

See, talk to and learn from our worlds best in Enterprise Excellence

Simple, fast and easy to attend events that are always high value

Connect into a community of local leaders on an Excellence Journey

Help others in your organisation see and learn from the best & gain inspiration.

Leadership

TESTIMONIALS:

"What a great format to keep me moving forward on my enterprise excellence journey. Listening to world-leading experts and discussing the topics with like-minded individuals is just what I need each month to keep me motivated and inspired!"

Russell Warner, Strategic Partnerships Manager - ETS Infrastructure Management

"It's been fantastic to be part of the Enterprise Excellence Forum. A combination of high-end content, interesting people from multiple industries, and some good networking opportunities. And the podcasts are a fantastic resource - also with high impact content. Looking forward to future events."

Gareth Brown, General Manager - Lean, Graincorp.

"I am really enjoying being part of this Community. To be able to regularly engage with some of the world's finest thought leaders and collaborate with other passionate Improvement Professionals is really adding value to my day-to-day and beyond. Lots of great practical knowledge and skill-building opportunities. I highly recommend you get involved!"

Andy Olrich
Continuous Improvement & Innovation Lead | Strategy & Engagement Hunter Water Corporation

If you have spent any notable time trying to make your organisational community stronger for tomorrow through Enterprise Excellence, you probably know it can be like swimming upstream. Sometimes the current seems to overpower all your efforts to progress, and then other times a burst of success seems to flow. It is a daunting and thankless pursuit. Often one can and will feel alone in the quest, questioning "is the squeeze worth the juice?". Not only has the Enterprise Academy reinforced the system side of this pursuit for me, the community element has been a wonderful missing part to the journey.

Andy Hecke, Technical Operations Manager, Matthews.
